**ats, Feed Wheat, Chopped Grain, Bran & Shorts.**

Have also received a Car Load of **SALT** for  
Drain and Stock.

**E. A. Baker & Co.**

English capitalists have purchased  
all the breweries in British Columbia,  
the present owner taking stock and  
acting as local managers. What a  
pity it is that British Capital can not  
be induced to invest in enterprises  
having for their object the develop-  
ment of the resources of the country.

An agent of the Northwest Maga-  
zine, and American paper which never  
misses an opportunity of deriding the  
Canadian North West, is now going  
through the country in the interests of  
that journal. It is only a short time  
ago that the editor of the North West  
Magazine stated that "He had no faith  
in the boastful statement of Canadian  
boosters that the wheat producing  
belt would eventually stretch across the  
great plains through Assiniboia and  
Alberta to the base of the Rockies,"  
and at another time described Canada  
as a "Starving Country." Why  
should the people of the North West  
support a journal that makes such  
statements, when there are plenty of  
patriotic papers published in the coun-  
try?

#### FOR THE FARMERS.

As threshing proceeds throughout  
the district the reports from the thresh-  
ers indicate that the yield is almost in  
every case exceeding expectations.  
These reports are greatly alike to the  
farmers themselves and to the busi-  
ness men whose property depends al-  
most entirely on the success of the  
wheat raising industry of the country.  
The yield of all kinds of grain is in a  
great many cases phenomenal. The  
latest reports reach us of wheat aver-  
aging between 10 and 30 bushels per  
acre and oats from 50 to 100 bushels  
per acre. That the North West has  
been blessed with an abundant crop  
which must produce good effects in  
inducing immigration is a matter for  
congratulation and thankfulness. Now  
that the crop is all either in stack or  
threshed, the practical farmer who al-  
lows no incidents however trifling  
whereby he may improve his circum-  
stances, pass unimproved, may by tak-  
ing a careful note of the situation  
throughout the district, learn many  
things that may be of benefit to him in  
future years. In a recent issue the  
Winnipeg Commercial drew some  
lessons from the experience of the  
season which may be of service to the  
farming community. As in Manitoba,  
so it is in the Moose Jaw district that  
overcropping is a prominent feature  
among the farmers of the country.  
Farmers put in more crop than they  
can handle or in other words, one  
hundred new farmers put in one hun-  
dred and fifty acres of crop. When  
harvest time comes help is scarce and  
wages are high, and they find it im-  
possible to secure the crop with which  
a Providence has blessed them. If  
such men would put in just the amount  
of crop they can handle, although  
they might not have a great number  
of bushels, it would be of better quality,  
they would secure a better price, be  
money in pocket and the reputation of  
the district increased. A few days  
ago, in driving north of town, we saw  
fully a hundred acres of wheat still in  
stack. This cannot fail to be injured  
to a considerable extent, and was  
caused entirely by overcropping. An  
other thing that requires consider-  
ation and from which lessons may  
be learned is the fact that there are  
not enough threshing machines in the  
district. Those farmers who have waited  
for the past month for a machine to  
visit their settlement, and now that  
winter has set in in good earnest, see  
a prospect of not being able to get  
their grain threshed until next spring  
realize the truth of this. In a number  
of cases, they have combined together  
and purchased machines to do their  
own threshing. There are taken in a  
year when the market is at its highest  
point, just after harvest, and in the fol-  
lowing May.

Farmers as a rule cannot afford to  
hold over their grain, so that there is  
an advantage in getting threshed early.  
Could they have done so, in the Moose  
Jaw district, they could have received  
fully 12 cents per bushel more for their  
wheat than they can at present. There  
is thus a loss of \$10,000 to the district  
which is certainly quite an item, and  
would purchase a considerable number  
of threshing machines. With a good  
crop next year and with the increased  
average, it will take twenty machines  
to thresh the grain before winter comes  
on.

#### LOST ON THE PRAIRIE.

Two Medicine Hat Boys Over-  
taken in Friday's Storm While  
Hunting a Cattle.

MEDICINE HAT, N. W. T., Nov. 23.  
—A 16-year-old son of L. B. Cochrane  
and a 10-year-old son of L. E. Walton,  
merchants of this place, whose ranches  
are just outside of town, were caught  
in last Friday night's blizzard while  
looking for some cattle. The storm  
being so severe and so sudden they  
were unable to find their way home  
that night, and searching parties were  
organized the following morning. They  
found no trace of them until last night,  
when the Cochrane boy was found six-  
teen miles from home frozen to death  
beside a hay stack, his horse eating  
hay over his dead body. The police  
are now scouring the country for the  
other boy.

#### THROUGH THE MOOSE JAW DISTRICT.

The North Country.

(Continued from issue of Nov. 15th.)

On October 25th we set out from  
Moose Jaw, to visit the scattered set-  
tlements in the northern portion of the  
Electoral District of Moose Jaw.  
Leaving Moose Jaw in the afternoon,  
we reached the valley of the Big Arm  
of the Qu'Appelle river and spent the  
night at the ranch of Mr. W. C. San-  
ders, twenty-five miles from town.  
Mr. S. has one of the best locations in  
the country for keeping a herd of, say  
200 head of cattle. He has with his  
family come to the North West in 1882,  
and located on 12-29-27, and secured  
homesteads for his sons, an adjoining  
section. He early realized the fact  
that in order to succeed in farming in  
the North West, it would be necessary  
to have some other source of revenue  
besides wheat raising. To this end he  
purchased a section of land in the val-  
ley from the C. P. R., on which he  
placed a small herd of cattle. At the  
time of the visit he had just completed  
threshing 3000 bushels of grain on his  
prairie farm, and has besides over one  
hundred head of cattle on his valley  
ranch. His dwelling house and the  
stables for his cattle are built in a  
dead ravine completely sheltered by  
high hills with wooded sides from the  
storms of winter, and through which  
does not a falling drop of the purest  
water. He has an abundant supply  
of hay, wood and water, in fact every-  
thing to make cattle raising profitable.  
Leaving Mr. Sanders's place early  
next morning, we ascended the high  
hills on the north side of the Qu'Ap-  
pelle Valley and struck across coun-  
try for Chamberlain station on the  
Qu'Appelle, Long Lake and Saskatchewan  
Railway operated as the Prince  
Albert branch of the C. P. R. The  
country crossed is an open rolling  
prairie, soil fair but gravelly, with  
boulder strewn patches. There is no  
wood, but the country is excellent for  
grazing purposes, there being a number  
of lakes of good water and numerous  
hay sloughs. Buffalo Point Hill,  
about two miles north of the valley, is  
quite prominent and commands an ex-  
tensive view. Chamberlain station is  
situated on S. E. 18-22-26, W. 2nd  
M. Here there is a very pretty, well  
sized section house in charge of Mr.  
A. Graydon, section foreman. The  
Little Arm of the Qu'Appelle flows  
south east, about half a mile from the  
section house. Along the Arm there  
are patches of poplar and a few small  
ranches. Leaving our horses at  
Chamberlain, we boarded the train at  
10:10 for Dunsmuir Station near  
Geyser & A'Court's ranch. The  
country along the line of railway for  
about sixty miles is similar to that  
north of the Big Arm. It is entirely  
unimproved, save by Cuyates, Antelope,  
Black Tail Deer, and Badgers, which  
as the iron horse rushes past, stare in  
wonder at this great disturber of the  
primitive solitude, and then scamper  
off to a place of safety, but the num-  
bers begin to trail behind in all three  
sections testify to the fact that this was  
at one time a favorite feeding ground  
of the now extinct monarchs of the  
plains. Occasionally a band of half-  
breeds with carts loaded with furs,  
for shipment at the nearest station was  
passed, giving additional evidence of  
the number of buffalo slaughtered on  
these plains and of the nutritious  
quality of the wild prairie grass. An  
outfit of five voyageurs, in charge of  
Mr. Norton of Winnipeg, have spent  
the summer in the northern part of the  
district, hunting the railway land  
grant. They have not yet completed  
their work, but the approach of winter  
will force a cessation of operations un-  
til next spring. Cook or 7th Siding,  
is on N. W. 11-24-28, West of 2nd  
P. M. Eight miles south west of  
Cook is the Eyrewood Lake sheep  
ranch of Mr. D. J. McLean. Donald  
has here 3000 sheep, and is literally  
conquering wealth. He has the country  
cannot be beaten for stock purposes  
and that he has the best location in the  
North West for sheep. The section  
men along the line were all busily en-  
gaged in erecting snow fences at the deep  
cuts. This was done by sticking into  
the ground, about ten yards from the  
cut, a row of evergreen trees, brought  
down from Duck Lake District. Dun-  
smuir thirty-three miles from Cham-  
berlain was reached at 12 o'clock when the  
train was left and we set out on foot to  
visit the ranches in the vicinity. About  
two and a half miles from Dunsmuir  
is the ranch of Mr. George Wilson,  
who has a very fine location with  
abundance of hay, wood, water and  
grazing land. He has about 100 head  
of stock, which he looks after and takes  
care of, with the assistance of Mr.  
Wilson. The stock were in fine con-  
dition and this industrious couple are  
making money rapidly. Five miles  
from George Wilson's place is the  
ranch of Mr. Robert Wilson, father of  
the Wilson Bros. of Moose Jaw, where  
we located for the night and next  
morning started for the ranch of  
Messrs. Gagen & A'Court five miles  
further west. Mr. Wilson's place is  
close to Brightwater Lake, in which  
there might have been water at the  
time it was surveyed and marked on  
the map, but at present the lake bed is  
a hay marsh, in which there are thou-  
sands of tons of the best hay. He has

about 50 head of cattle and at the  
time of the visit was building a stable  
for the winter. The old gentleman  
and his son Archie live together quite  
happy and contented. He has hay  
enough on his place for ten times his  
number of cattle. He gets very en-  
thusiastic when describing the advan-  
tages of his place for stock, and from  
all appearances, there are few better  
in the North West. His hay lands ex-  
tend down into Brightwater, the west  
half of the ranch, on which he winters  
having plenty of timber, in which his  
stock feed during the winter days, and  
from the storms raging on the plains,  
and return to their stables at night.  
The greater part of the night was  
spent in learning from Mr. Wilson all  
we could about the country and in  
answering inquiries about Moose Jaw  
and the people in the district. The  
next morning procuring a horse from  
Mr. Wilson we started through the  
hills for Gagen & A'Court's place, a  
description of which we reserve for a  
future issue.

#### HOSPITAL ENTERTAINMENT.

The concert given last Friday eve-  
ning in aid of the Medicine Hat Hos-  
pital, was one of the best of its kind ever  
held in Moose Jaw. The presence of  
the String Band of the North West  
Mounted Police at Regina greatly en-  
livened the programme. The perform-  
ance of Miss Lily Evans showed her to  
be a mistress of the Art of Elocution.  
Her rendition of "The Cherry Blossom"  
from Ben Hur, was particularly good.  
As she described the exciting con-  
dition the audience were worked up to a  
high degree of excitement, almost rival-  
ling that of the spectators of the race. Miss  
Alexander and Mr. Gaffney were in  
good voice and their duet was capta-  
niously enjoyed. Mrs. Foshan estab-  
lished the reputation gained at the concert  
of a few weeks ago. Staff Sergeant  
Mason, was the favorite of the evening.  
His character songs being catching and  
well rendered, provoking roars of laugh-  
ter and rounds of applause. He was  
encored no less than four times. The  
proceeds amounted to about \$70.  
Should the same troupe visit Moose  
Jaw again, they will be sure of a much  
larger house than greeted them last  
Friday evening. Mr. Birbeck of the  
C. P. R. deserves great credit for the  
trouble taken to make these concerts a  
success in Moose Jaw. The following  
is the programme:—

1. Overture, "The Crown of Gold,"  
Mounted Police Orchestra.
2. Character Song, "Dearly Beloved  
Brother," Mr. Mason.
3. Vocal Solo, "Someday's Pride,"  
Mrs. Birbeck.
4. Selection, "Alone," Mounted Police  
Orchestra.
5. Readings, "Scene from Leah the Pro-  
phetess," "The Fairy Tale," Miss Lily Evans.
6. Vocal Solo, "Columbia's Dream,"  
Mr. Gaffney.
7. Vocal Solo, "That Melody Divine,"  
Mrs. Foshan.

- INTERMISSION.
1. Overture, "Invaders," Mounted  
Police Orchestra.
  2. Character Song, "Just before the Bat-  
tle," Mr. Mason.
  3. Readings, "The Cherry Blossom,"  
from Ben Hur, "The Naughty Little Girl,"  
Miss Lily Evans.
  4. Selection, "Le Duet," Mounted  
Police Orchestra.
  5. Vocal Duet, "Matrimonial Swells,"  
Mrs. Birbeck and Mr. Gaffney.
  6. Character Song, "The Music Teacher,"  
Mr. Mason.
  7. Tableau of Emotions, Miss Lily  
Evans.

Corporal Armstrong of the Porcupine  
Hills detachment, N. W. M. P.,  
had a most unfortunate experience  
last week. At about 10 o'clock in the  
morning, he left Messrs. Lewis &  
Elliot's ranch to cross the hills to the  
Porcupine detachment. He reached  
Mr. R. Craig's ranch all right, and  
left at about 3 o'clock in the afternoon.  
He lost his way, and night coming on,  
he looked for a place to camp. He  
found a hole in the side of a hill, and  
after lighting a fire just outside got in-  
side of it, holding his horse by his  
halter. The horse became frightened  
at something and pulled away. Cor-  
poral Armstrong put in the night in  
this hole, and the next morning fol-  
lowed up the tracks of his horse. He  
found him in a band of acres, but  
could not catch him. He then started  
out on foot, and after travelling until  
evening, saw a house in the distance.  
When he arrived at the house he found  
that several of his toes were frozen.  
He was brought into Macleod and is  
now under Dr. Aylen's care. He  
feared that he will lose parts of some of  
his toes.

Adeline's Ancestry.—My brother had an  
ancestral complaint about a year ago  
and to remediate seemed to require him.  
I last met him advised as to try Fowler's Ex-  
tract of Wild Strawberry and before he had  
taken one bottle he was entirely cured.

Adelaide (London, Baldwin, Ont.)

The Detroit Free Press says:—Hard-  
ly a day passes by but two or three  
prairie schooners pass through Windsor,  
loaded with persons who yearn to go  
their Canadian farms and strike out  
for the west, only to return a sadder  
but wiser lot. Yesterday Thomas  
Kealy came through Windsor on his  
way to Leamington, having driven the  
past ten weeks travelled nearly  
1,100 miles. He left Essex County  
six years ago, settling in Knox Co.,  
Neb., and his story of only having  
harvested two crops during his stay  
there is not very encouraging. He  
says there is no place like Canada,  
and was overjoyed at being thirty miles  
from his destination.

#### A MOUNTAIN OF TRUTHS DE- SPISED BY SOME PEOPLE!

Some Will Not Examine Truth  
Because They Fear It!

Convincing Canadian Testimony!

There are truths which some men despise  
because they are not examined them, and  
which they will not examine because they  
fear them. Important and mighty truths  
are continually being revealed, all going  
to prove that our Canadian people have now  
in their midst the greatest agency for the  
complete cure of nervousness, sleeplessness,  
headaches, indigestion, neuralgia, and all the  
brain, dyspepsia and rheumatism, ever heard  
of in the human world. It is the great  
remedy of life that our forefathers so eagerly  
sought for but could not find. Providence  
in its own good time, through one of the  
greatest physicians of the century, gave to  
the world this wonderful remedy, and it will  
take away from our Canadian people a living  
torment. It is the only remedy that will not  
do any harm, but will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will not  
only cure but strengthen the system, and will  
not only cure but strengthen the system, and  
will not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strengthen  
the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-  
en the system, and will not only cure but  
strengthen the system, and will not only  
cure but strengthen the system, and will  
not only cure but strengthen the system,  
and will not only cure but strengthen the  
system, and will not only cure but strength-

# THE WEEK'S NEWS.

## CANADIAN.

It is officially stated that the Canadian Pacific railway is about to build a new hotel in Quebec.

Mr. Mackenzie Bowell has returned to Ottawa after his trip through British Columbia.

Hay in New Brunswick is bringing as high a price as it ever did before the McKinley tariff.

It is estimated that grain is being shipped out of Manitoba and the Northwest, worth C.P.R. at the rate of 100,000 bushels a day.

Hon. J. A. Chaplin is of exactly the same age as the Prince of Wales.

It is estimated that there are 2,400,000 French in America, of whom there are 1,200,000 in the Province of Quebec.

The death of Mrs. Holton, widow of Hon. L. H. Holton, the former Liberal leader, is reported. She was 75 years of age.

Nearly half a million dollars have been expended in new buildings in Brandon, Man., this year.

The Princess Louise has consented to become a patroness of the association for erecting a monument to the memory of Sir John Macdonald.

By the new Dominion cattle regulation a ban of seven cents a head is imposed to carry out the law on all animals exported from Canada.

An effort is being made to establish smelting works at Calgary. The discovery there of natural gas, it is thought, will result in Calgary becoming a smelting center.

The Earl of Aberdeen intends to establish a sanatorium in his recently purchased farm in British Columbia.

A special order from London says efforts are being made to embarrass the Canadian Government in its efforts to induce capitalists to undertake a vast Atlantic mail service.

The body of Constable Harris, of the North-West Mounted Police, has been found on the bank of the river Saginaw with a bullet wound in the head. Four play is suspected.

Two Chinese lepers who arrived in Vancouver, B. C., from New York, two months ago, were turned away on Tuesday, as the Council refused to bear the expenses of their maintenance.

The trial of Talbot, Hume, and Larose, charged with conspiring to defraud the Department of Public Works, was opened the other day before the Ottawa Police Magistrate, and adjourned at the request of counsel to Wednesday.

Mr. B. H. Oiler appeared to prosecute.

Summing up a passenger on the Grand Trunk railway No. 1 express, while in a state of somnolence, walked off the platform one of the cars when the train was near Brockville, and running at the rate of 20 miles an hour. Strange to say the man escaped unhurt.

The Canada North-West Land Company reported sales of 22,975 acres for \$164,742 for the nine months ended September, compared with 14,616 acres and \$26,828 for the same period of last year.

An important society event in Ottawa last week was the marriage of Miss Gertrude D. Macdonald, daughter of the late Sir John Macdonald, to Mr. J. M. Fleming, son of Mr. Sanford Fleming, C.M.G.

On Sunday evening on leaving a Salvation Army meeting at Bloomfield, Ont., a man named Emory Ferguson was attacked by a party of ruffians. He drew his revolver to defend himself, but in the struggle that ensued the revolver went off and he was wounded on the forehead.

A woman on Ferguson that it is feared will prove fatal.

## GREAT BRITAIN.

A severe epidemic of influenza prevails in Dundee, Scotland.

Sir John Frost has been appointed Secretary of the Treasury.

Mr. George Hawkesworth Bond, M. P. for East Dorsetshire, Eng., died last week. He was a Conservative.

Sir James Ferguson, British Postmaster-General, announces that in future retired soldiers will have preference for employment as postmen.

Monday, the fifteenth anniversary of the death of the Prince of Wales, his Royal Highness was presented with a magnificent gold cigar box weighing one hundred ounces, the gift of the theatrical profession of London.

On Wednesday morning Rev. Frederick Harford, mace-bearer of Westminster, was fined \$8 for being drunk and disorderly the previous night.

It is stated that the English Liberals are greatly excited over the question of Mr. Gladstone's successor, as Sir William Vernon Harcourt's impaired health rules him out of the running.

The returns of the British Board of Trade for October show that the imports decreased £270,000 and the exports decreased \$2,510,000 as compared with those for the corresponding month last year.

Mr. John E. Redmond, the defeated candidate for the late Mr. Parnell's seat, after the result of the poll had been announced, declared his intention of continuing the struggle to obtain recognition by the people of Ireland of the Parnellite principles.

A number of ladies of Longford have decided to present a silver mounted whip to Mr. McDermott, who on Tuesday gave Mr. Tim Healy a horsewhipping in Dublin for speaking in a derogatory manner of the widow of the Irish leader.

There will be a big convention of women's labour societies in London early in December, and it is hoped that Mrs. Gladstone will be present and give the women the benefit of his views on the labour question, and especially in its relation to women.

## UNITED STATES.

It is estimated that there are 40,000 anarchists and socialists in Chicago.

The New York Sun names the Republican ticket in next year's Presidential fight as Blaine and McKinley.

At Shelbyville, Ind., a young lady in a fight with a fat Newfoundland pup in an endeavor to cure herself of consumption.

Seventeen miners were killed and two fatally injured at the Anaconda mine, Montana, last week, through the cage rope breaking.

The Edgemoor barley syndicate of Chicago has secured 250,000 acres of land in North Dakota, on which it is proposed to place German farmers to raise barley for malting purposes.

An official report of the earthquake in Japan to the Japanese minister at Washington gives the number of killed as 6,300; injured, 18,000; houses totally destroyed, 7,260; and badly damaged, 12,000.

Col. John F. Mims, in the October number of the North American Review, announced that he had been cured of the malady of drunkenness. Ten days ago he was propped up by a nurse in the gutter. He was sent to Blackwell's island and died yesterday morning.

The first case of a Canadian woman being deported under the Alien Contract Labor Law of the United States was that of Mrs. Mary M. Johnson of Welland, Ont. Mrs. Johnson went to Buffalo under contract in September to work as a milliner. As soon as Inspector B. Bar had discovered her he secured her discharge and sent her back to Canada.

Mrs. Marie Halloran, of Wolcott, Mass., a young woman who has been only five weeks a widow, was arrested on Monday charged with attempting to kill her husband by mixing poison with his food. She claimed to have powder to increase her husband's affection, but she suspects Paris green.

## IN GENERAL.

The winter has commenced with unusual severity in Eastern Europe.

# THE WEEK'S NEWS.

The British convict steamer Enterprise foundered in a cyclone in the bay of Bengal on Monday last and 77 of her crew of 83 were lost.

Brigandage is increasing in the famished districts of Russia, where desperate men are plundering freight trains and sack-farms and manor-houses.

Russia is greatly annoyed because the Porte has refused permission to disinter the Russian soldiers who were killed during the Russo-Turkish war on Turkish soil and are now buried with honors near Constantinople.

The pope is said to be suffering from cerebral anemia, and his condition is causing apprehension.

The Nizam of Hyderabad spends \$100,000 a year. The fact that he has 500 wives accounts for his extravagance.

Cold weather prevails throughout Germany and the ground is covered with snow. A postman has been found frozen to death.

The recent elections in Chili resulted in a sweeping victory for the Liberal party. Admiral Jorge Montt was elected President.

Baron Arthur Rothschild, a nephew of the head of the great financial house is serving his 12 months in the French army as a private soldier.

If a settlement is not arrived at by the end of this month the combined fleets of the powers will seize Shanghai and other Chinese ports and take possession of the customs until China has given satisfaction for the recent outrages.

A despatch to the London Times says that it is probable an attempt will be made in Brazil to overthrow the Republic and restore the Empire, and that Dom Pedro's grandsons are chief of the late under a regime of three constitutional monarchs.

Severe snowstorms continued in Bulgaria. At some points the snow is ten feet deep. Many persons have died from the effects of the cold, and thousands of cattle and sheep have been lost. Numerous wrecks are reported in the Black Sea.

## ANTICIPATION OF WATCHES.

There are movements an uncertain as an April day.

Decidedly the watch is a very queer thing. It possesses some unaccountable peculiarities. Some time ago, when there had been a succession of fine displays of the aurora borealis, it was estimated that in a single night in New York the manufactory of not less than 3,000 watches broke. The estimate is based on actual enquiries.

Fine, sensitive watches are particularly liable to be broken by electrical storms. During the months of June, July, and August, when these phenomena are most frequent, there are more main springs broken during the last three months of the year. They break in a variety of ways, sometimes snapping into as many as five pieces.

It is a fact that since the use of electric light, watches, some of them very fine ones, have been broken in this way. While in this condition they are useless as timekeepers. This defect used to be considered incurable, and because of it thousands of watches have been thrown away for much money had been spent on them in vain attempts to persuade them to keep good time.

Among the many methods resorted to were washing the parts in garlic juice, re-finishing and passing them through the fire. But all these devices were entire failures, or only in part effective.

There are occasions when it is a very serious matter to have your watch mangled. Among the many methods resorted to were washing the parts in garlic juice, re-finishing and passing them through the fire. But all these devices were entire failures, or only in part effective.

# THE WEEK'S NEWS.

Useful Advice to Young Men.

A great problem which confronts many ambitious young men of limited opportunities is how to make the best of their resources. A young man of this class writes to the New York Sun as follows:— "What would you say to a young man who is ambitious to get on, but whose circumstances are such that he is unable to take any risk? It is doubtless a fact that many young men are so hemmed in by responsibility as to be unable to make a venture on their own account. Such young men would certainly profit by any hint you might offer." The Sun replies at some length to the question and reads its correspondent some wholesome advice which should prove of value not only to him but to any others in similar circumstances. The Sun says to the young man that if "his circumstances forbid his taking any risk he should accept the situation as a matter of course. But there are no such circumstances. Every man is obliged to take risks, the risks of his own life or death, his health, or his illness, and the chances and changes of the fortune of other people. He cannot escape responsibilities, and the way in which he bears them will be a test of his ability. Every man is obliged to take risks, the risks of his own life or death, his health, or his illness, and the chances and changes of the fortune of other people. He cannot escape responsibilities, and the way in which he bears them will be a test of his ability. Every man is obliged to take risks, the risks of his own life or death, his health, or his illness, and the chances and changes of the fortune of other people. He cannot escape responsibilities, and the way in which he bears them will be a test of his ability.
